HALVORSEN LIGHT 9.5PT

A shorter waterline length makes for a slower vessel, however extra sail area made up for any deficiencies in speed. Having been outfitted for cruising, it was a pleasure simply to be aboard this magnificent vessel. I had carefully considered the internal layout and opted for an unconventional approach. A shorter waterline length makes for a slower vessel, however extra sail area made up for any deficiencies in speed. HALVORSEN REGULAR 9.5PT

Covered over with a Polytarp tent that took only two hours to make, the vessel was comfortable and very roomy for one or two people and sleeping aboard made it much easier to visit certain anchorages. Her main feature is a long and powerful lightweight hull with enough enclosed buoyancy to float her in case the unthinkable happens. Covered over with a Polytarp tent that took only two hours to make, the vessel was comfortable and very roomy for one or two people and sleeping aboard made it much easier to visit certain anchorages. The new OpenType family of eight weights from

Australian Type Foundry.

Halvorsen is one of the first releases of an international-quality OpenType family from an Australian designer: Wayne Thompson of Australian Type Foundry.

"I tried to create a modern sans-serif with a high x-height, that would be suitable for text usage. I wanted it to have less of the stiffness common to other sans families — the aim was to make Halvorsen classy and friendly at the same time".

Halvorsen contains many OpenType features such as standard ligatures, small caps and non-lining numerals.
